PURE POND

For **crystal** clear and **healthy** ponds

Pure Pond are **biodegradable balls**, crammed full of live bacteria that are slowly released when they are needed most. With over **8,000,000,000** bacteria per litre of Pure Pond Balls, when you add Pure Pond to your pond, the clarity will amaze you. You can add the Pure Pond into any filter you may have, but for optimum results, use them in our **NEW Pure Pond Filtration System**.

When you introduce the Pure Pond balls into the biological chamber of your **Nexus**, they become one with moving bed, agitating alongside the **K1 media**, just waiting to smooth out any peaks and troughs of the Ammonia/Nitrite cycle. The Pure Pond balls also contain natural enzymes which will help to breakdown organic waste, leaving your pond with healthier, crystal clear water.

Pure Pond works equally well in **multi bay filters** or **box filters** in between sponges or matting. It can also be put into **pressure filters** and **bead filters** with excellent results.

Winner of
**'Best Water Gardening
Product of the Year'**
at the AQUA 2010 Trade Show.

Pure Pond is available in **500ml** containers, which are suitable as a monthly treatment for ponds up to 10,000 litres, **1 litre** containers for ponds up to 20,000 litres and **2 litre** buckets for ponds up to 40,000 litres to be used on a monthly basis.
